### **JURISDICTION OF THE COURT**

This complaint arises out of the violation of my Fourth and Eight Amendment rights to the United States Constitution and Title 42 U.S.C. 1983.

### **COMPLAINT**

I filed for social security disability in 2010 based on the fact that I have an electronic sensor implanted in the left cheek of my rectum. The invention is a modified version of the Telemedicine instrumentation pack (see appendix B). That invention was first constructed to monitor astronauts health in space. The invention was then modified to pick up the frequency of the body, being between 20Hz to 1,500 Hz, by using milled lead crystal glass and fiber optics. The fiber optics is covered with the milled glass and fashioned into a spring, as seen in appendix's C, and coated with a fiber armored coating, which makes it a sensor cable.

The social Security Administration disregarded my true disability and gave me the disability of a schizophrenic, see appendix A page 3 .

Warden Burl Cain illegally allowed doctors and/or medics from the Eastern Louisiana Mental Health Systems to enter the prison grounds

unnoticed and implanted the device into my rectum. The hospital is located two miles from the prison. The code to access the instrumentation was given to the prison guards ,then to the public,and for this I suffer.see Appendix E & F

The Louisiana Department of Health and Hospitals is aware of this crime ,but will not do anything to stop it.see the provision on forensic services Appendix D.

The Social Security Administration has firsthand knowledge of this matter but shows deliberate indifferent .see appendix A.

A complaint was filed in the United States District Court for the District of Columbia; Thibeaux V. Social Security Administration;12-CV-1588. See appendix A.
